

PENTEK INTELLIDRIVE

Whole home constant pressure system

Homeowners with low water pressure can experience weak showers, unclean dishes, dry lawns and more. Pentair Pentek Intellidrive Constant Pressure System™ is a variable frequency drive that directs changes in submersible pump motor speed, responding to fluctuations in household demand and includes built-in system protection. This device helps to maintain constant water pressure for private wells.

APPLICATIONS

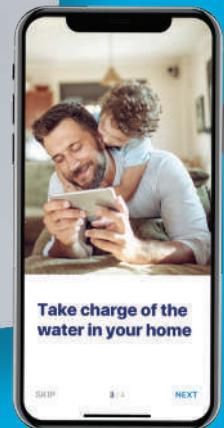

Residential water systems, landscape irrigation and water transfer use.
